Senior Education Profile

Students in Queensland are issued with a Senior Education Profile (SEP) upon completion of senior studies. This profile may include a:

- statement of results
- Queensland Certificate of Education (QCE)
- Queensland Certificate of Individual Achievement (QCIA).

For more information about the SEP see: www.qcaa.qld.edu.au/senior/certificatesqualifications/sep.

Statement of results

Students are issued with a statement of results in the December following the completion of a QCAA-developed course of study. A new statement of results is issued to students after each QCAA-developed course of study is completed.

A full record of study will be issued, along with the QCE qualification, in the first December or July after the student meets the requirements for a QCE.

Queensland Certificate of Education (QCE)

Students may be eligible for a Queensland Certificate of Education (QCE) at the end of their senior schooling. Students who do not meet the QCE requirements can continue to work towards the certificate post-secondary schooling. The QCAA awards a QCE in the following July or December, once a student becomes eligible. Learning accounts are closed after nine years; however, a student may apply to the QCAA to have the account reopened and all credit continued.

Queensland Certificate of Individual Achievement (QCIA)

The Queensland Certificate of Individual Achievement (QCIA) reports the learning achievements of eligible students who complete an individual learning program. At the end of the senior phase of learning, eligible students achieve a QCIA. These students have the option of continuing to work towards a QCE post-secondary schooling.

Senior subjects

The QCAA develops four types of senior subject syllabuses — General, Applied, Senior External Examinations and Short Courses. Results in General and Applied subjects contribute to the award of a QCE and may contribute to an Australian Tertiary Admission Rank (ATAR) calculation, although no more than one result in an Applied subject can be used in the calculation of a student's ATAR.

Extension subjects are extensions of the related General subjects and are studied either concurrently with, or after, Units 3 and 4 of the General course.

Typically, it is expected that most students will complete these courses across Years 11 and 12. All subjects build on the P–10 Australian Curriculum.

General syllabuses

General subjects are suited to students who are interested in pathways beyond senior secondary schooling that lead primarily to tertiary studies and to pathways for vocational education and training and work. General subjects include Extension subjects.

Applied syllabuses

Applied subjects are suited to students who are primarily interested in pathways beyond senior secondary schooling that lead to vocational education and training or work.

Senior External Examination

The Senior External Examination consists of individual subject examinations provided across Queensland in October and November each year by the QCAA.

Short Courses

Short Courses are developed to meet a specific curriculum need and are suited to students who are interested in pathways beyond senior secondary schooling that lead to vocational education and training and establish a basis for further education and employment. They are informed by, and articulate closely with, the requirements of the Australian Core Skills Framework (ACSF). A grade of C in Short Courses aligns with the requirements for ACSF Level 3.

For more information about the ACSF see: https://www.education.gov.au/australian-core-skills-framework.

Underpinning factors

All senior syllabuses are underpinned by:

- literacy the set of knowledge and skills about language and texts essential for understanding and conveying content
- numeracy the knowledge, skills, behaviours and dispositions that students need to use mathematics in a wide range of situations, to recognise and understand the role of mathematics in the world, and to develop the dispositions and capacities to use mathematical knowledge and skills purposefully.

General syllabuses and Short Courses

In addition to literacy and numeracy, General syllabuses and Short Courses are underpinned by:

• 21st century skills — the attributes and skills students need to prepare them for higher education, work and engagement in a complex and rapidly changing world. These include critical thinking, creative thinking, communication, collaboration and teamwork, personal and social skills, and information & communication technologies (ICT) skills.

Applied syllabuses

In addition to literacy and numeracy, Applied syllabuses are underpinned by:

 applied learning — the acquisition and application of knowledge, understanding and skills in real-world or lifelike contexts

- community connections the awareness and understanding of life beyond school through authentic, real-world interactions by connecting classroom experience with the world outside the classroom
- core skills for work the set of knowledge, understanding and non-technical skills that underpin successful participation in work.

Vocational education and training (VET)

Students can access VET programs through the school if it:

- is a registered training organisation (RTO)
- has a third-party arrangement with an external provider who is an RTO
- offers opportunities for students to undertake school-based apprenticeships or traineeships.

Australian Tertiary Admission Rank (ATAR) eligibility

The calculation of an Australian Tertiary Admission Rank (ATAR) will be based on a student's:

- best five General subject results or
- best results in a combination of four General subject results plus an Applied subject result or a Certificate III or higher VET qualification.

The Queensland Tertiary Admissions Centre (QTAC) has responsibility for ATAR calculations.

English requirement

Eligibility for an ATAR will require satisfactory completion of a QCAA English subject.

Satisfactory completion will require students to attain a result that is equivalent to a Sound Level of Achievement in one of five subjects — English, Essential English, Literature, English and Literature Extension or English as an Additional Language.

While students must meet this standard to be eligible to receive an ATAR, it is not mandatory for a student's English result to be included in the calculation of their ATAR.

General syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

General syllabuses course overview

General syllabuses are developmental four-unit courses of study.

Units 1 and 2 provide foundational learning, allowing students to experience all syllabus objectives and begin engaging with the course subject matter. It is intended that Units 1 and 2 are studied as a pair. Assessment in Units 1 and 2 provides students with feedback on their progress in a course of study and contributes to the award of a QCE.

Students should complete Units 1 and 2 before starting Units 3 and 4.

Units 3 and 4 consolidate student learning. Assessment in Units 3 and 4 is summative and student results contribute to the award of a QCE and to ATAR calculations.

Extension syllabuses course overview

Extension subjects are extensions of the related General subjects and include external assessment. Extension subjects are studied either concurrently with, or after, Units 3 and 4 of the General course of study.

Extension syllabuses are courses of study that consist of two units (Units 3 and 4). Subject matter, learning experiences and assessment increase in complexity across the two units as students develop greater independence as learners.

The results from Units 3 and 4 contribute to the award of a QCE and to ATAR calculations.

Assessment

Units 1 and 2 assessments

Schools decide the sequence, scope and scale of assessments for Units 1 and 2. These assessments should reflect the local context. Teachers determine the assessment program, tasks and marking guides that are used to assess student performance for Units 1 and 2.

Units 1 and 2 assessment outcomes provide feedback to students on their progress in the course of study. Schools should develop at least *two* but no more than *four* assessments for Units 1 and 2. At least *one* assessment must be completed for *each* unit.

Schools report satisfactory completion of Units 1 and 2 to the QCAA, and may choose to report levels of achievement to students and parents/carers using grades, descriptive statements or other indicators.

Units 3 and 4 assessments

Students complete a total of *four* summative assessments — three internal and one external — that count towards the overall subject result in each General subject.

Schools develop *three* internal assessments for each senior subject to reflect the requirements described in Units 3 and 4 of each General syllabus.

The three summative internal assessments need to be endorsed by the QCAA before they are used in schools. Students' results in these assessments are externally confirmed by QCAA

assessors. These confirmed results from internal assessment are combined with a single result from an external assessment, which is developed and marked by the QCAA. The external assessment result for a subject contributes to a determined percentage of a students' overall subject result. For most subjects this is 25%; for Mathematics and Science subjects it is 50%.

Instrument-specific marking guides

Each syllabus provides instrument-specific marking guides (ISMGs) for summative internal assessments.

The ISMGs describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Schools cannot change or modify an ISMG for use with summative internal assessment.

As part of quality teaching and learning, schools should discuss ISMGs with students to help them understand the requirements of an assessment task.

External assessment

External assessment is summative and adds valuable evidence of achievement to a student's profile. External assessment is:

- common to all schools
- administered under the same conditions at the same time and on the same day
- developed and marked by the QCAA according to a commonly applied marking scheme.

The external assessment contributes a determined percentage (see specific subject guides — assessment) to the student's overall subject result and is not privileged over summative internal assessment.

Applied syllabuses

Structure

The syllabus structure consists of a course overview and assessment.

Applied syllabuses course overview

Applied syllabuses are developmental four-unit courses of study.

Units 1 and 2 of the course are designed to allow students to begin their engagement with the course content, i.e. the knowledge, understanding and skills of the subject. Course content, learning experiences and assessment increase in complexity across the four units as students develop greater independence as learners.

Units 3 and 4 consolidate student learning. Results from assessment in Applied subjects contribute to the award of a QCE and results from Units 3 and 4 may contribute as a single input to ATAR calculation.

A course of study for Applied syllabuses includes core topics and elective areas for study.

Assessment

Applied syllabuses use *four* summative internal assessments from Units 3 and 4 to determine a student's exit result.

Schools should develop at least *two* but no more than *four* internal assessments for Units 1 and 2 and these assessments should provide students with opportunities to become familiar with the summative internal assessment techniques to be used for Units 3 and 4.

Applied syllabuses do not use external assessment.

Instrument-specific standards matrixes

For each assessment instrument, schools develop an instrument-specific standards matrix by selecting the syllabus standards descriptors relevant to the task and the dimension/s being assessed. The matrix is shared with students and used as a tool for making judgments about the quality of students' responses to the instrument. Schools develop assessments to allow students to demonstrate the range of standards.

Essential English and Essential Mathematics — Common internal assessment

Students complete a total of *four* summative internal assessments in Units 3 and 4 that count toward their overall subject result. Schools develop *three* of the summative internal assessments for each senior subject and the other summative assessment is a common internal assessment (CIA) developed by the QCAA.

The CIA for Essential English and Essential Mathematics is based on the learning described in Unit 3 of the respective syllabus. The CIA is:

- developed by the QCAA
- common to all schools
- delivered to schools by the QCAA
- administered flexibly in Unit 3
- administered under supervised conditions
- marked by the school according to a common marking scheme developed by the QCAA.

The CIA is not privileged over the other summative internal assessment.

Summative internal assessment — instrument-specific standards

The Essential English and Essential Mathematics syllabuses provide instrument-specific standards for the three summative internal assessments in Units 3 and 4.

The instrument-specific standards describe the characteristics evident in student responses and align with the identified assessment objectives. Assessment objectives are drawn from the unit objectives and are contextualised for the requirements of the assessment instrument.

Senior External Examinations

Senior External Examinations course overview

A Senior External Examination syllabus sets out the aims, objectives, learning experiences and assessment requirements for each of these subjects.

Results are based solely on students' demonstrated achievement in examinations. Work undertaken before an examination is not assessed.

The Senior External Examination is for:

- low candidature subjects not otherwise offered as a General subject in Queensland
- students in their final year of senior schooling who are unable to access particular subjects at their school
- adult students (people of any age not enrolled at a Queensland secondary school)
 - to meet tertiary entrance or employment requirements
 - for personal interest.

Senior External Examination results may contribute credit to the award of a QCE and contribute to ATAR calculations.

For more information about the Senior External Examination, see: www.qcaa.qld.edu.au/senior/see.

Assessment

The Senior External Examination consists of individual subject examinations that are held once each year in Term 4. Important dates and the examination timetable are published in the Senior Education Profile (SEP) calendar, available at: https://www.qcaa.qld.edu.au/senior/sep-calendar.

Results are based solely on students' demonstrated achievement in the examinations. Work undertaken before an examination is not assessed. Results are reported as a mark and grade of A–E. For more information about results, see the QCE and QCIA policy and procedures handbook, Section 10.

Short Courses

Course overview

Short Courses are one-unit courses of study. A Short Course includes topics and subtopics. Results contribute to the award of a QCE. Results do not contribute to ATAR calculations.

Short Courses are available in:

- Literacy
- Numeracy
- Aboriginal and Torres Strait Islander Languages
- Career Education.

Assessment

A Short Course uses two summative school-developed assessments to determine a student's exit result. Short Courses do not use external assessment.

The Short Course syllabus provides instrument-specific standards for the two summative internal assessments.

Maleny State High School Subject Information

In Semester 2 2020 Year 10 students have had the option to elect their core subjects. Each of the semester 2 subjects provides a path into a Senior Syllabus in Year 11

2020 Year 10 Semester 2 Core Subject Offerings

| Faculty | 2020 Year 10 Subject | 2021 Year 11 Subject |
|-------------|----------------------------|-----------------------|
| English | Introduction to Senior | English |
| | English | Literature |
| | Introduction to Essential | Essential English |
| | English | |
| Mathematics | Introduction to | Mathematical Methods |
| | Mathematical Methods | |
| | Introduction to General | General Mathematics |
| | Mathematics | |
| | Introduction to Essential | Essential Mathematics |
| | Mathematics | |
| Humanities | Introduction to History | Modern History |

| | Engineering Skills | | Film, Television |
| | | | and New Media |
| | Hospitality | | Music |
| | Practices | | |
| Science | Biology | | Music Extension |
| | Chemistry | | Visual Art |
| | Physics | Languages | Japanese |
| | Psychology | | |

General Mathematics General senior subject

General Mathematics' major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P–10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- comprehend mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|---|--|
| Money, measurement and relations Consumer arithmetic Shape and measurement Linear equations and their graphs | Applied trigonometry, algebra, matrices and univariate data Applications of trigonometry Algebra and matrices Univariate data analysis | Bivariate data, sequences and change, and Earth geometry Bivariate data analysis Time series analysis Growth and decay in sequences Earth geometry and time zones | Investing and networking Loans, investments and annuities Graphs and networks Networks and decision mathematics |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|
| Summative internal assessment 1 (IA1): • Problem-solving and modelling task | 20% | Summative internal assessment 3 (IA3): • Examination | 15% |
| Summative internal assessment 2 (IA2): • Examination | 15% | - | |
| Summative external assessment (EA): 50% • Examination | | | |

| Study Requirements | Special Requirements |
|---|--|
| Being a General subject a significant commitment of time and energy to complete the course successfully is required. This includes: | A scientific calculator (Casio fx82 AU PLUS II), 30cm ruler |
| Three lesson per week face to face teaching | |
| Regular study at least 3 times each week for a minimum of 1 hour per session, possibly in study groups | |
| Significant increase in work load when preparing for assessments | |

Mathematical Methods General senior subject

Mathematical Methods' major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- comprehend mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|--|---|---|
| Algebra, statistics and functions Arithmetic and geometric sequences and series 1 Functions and graphs Counting and probability Exponential functions 1 Arithmetic and geometric sequences | Calculus and further functions Exponential functions 2 The logarithmic function 1 Trigonometric functions 1 Introduction to differential calculus Further differentiation and applications 1 Discrete random variables 1 | Further calculus The logarithmic function 2 Further differentiation and applications 2 Integrals | Further functions and statistics Further differentiation and applications 3 Trigonometric functions 2 Discrete random variables 2 Continuous random variables and the normal distribution Interval estimates for proportions |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|
| Summative internal assessment 1 (IA1): • Problem-solving and modelling task | 20% | Summative internal assessment 3 (IA3): • Examination | 15% |
| Summative internal assessment 2 (IA2): • Examination | 15% | | |
| Summative external assessment (EA): 50% • Examination | | | |

| Study Requirements | Special Requirements |
|---|--|
| Being a General subject a significant commitment of time and energy to complete the course successfully is required. This includes: | A scientific calculator (Casio fx82 AU PLUS II), 30cm ruler |
| Three lesson per week face to face teaching | |
| Regular study at least 3 times each week for a minimum of 1 hour per session, possibly in study groups | |
| Significant increase in work load when preparing for assessments | |

Specialist Mathematics General senior subject

Specialist Mathematics' major domains are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Specialist Mathematics is designed for students who develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Student learning experiences range from practising essential mathematical routines to developing procedural fluency, through to investigating scenarios, modelling the real world, solving problems and explaining reasoning.

Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- comprehend mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions, and prove propositions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Structure

Specialist Mathematics is to be undertaken in conjunction with, or on completion of, Mathematical Methods.

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|--|---|--|
| Combinatorics, vectors and proof • Combinatorics • Vectors in the plane • Introduction to proof | Complex numbers, trigonometry, functions and matrices • Complex numbers 1 • Trigonometry and functions • Matrices | Mathematical induction, and further vectors, matrices and complex numbers Proof by mathematical induction Vectors and matrices Complex numbers 2 | Further statistical and calculus inference Integration and applications of integration Rates of change and differential equations Statistical inference |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|
| Summative internal assessment 1 (IA1): • Problem-solving and modelling task | 20% | Summative internal assessment 3 (IA3): • Examination | 15% |
| Summative internal assessment 2 (IA2): • Examination | 15% | | |
| Summative external assessment (EA): 50% • Examination | | | |

| Study Requirements | Special Requirements |
|---|--|

| Regular study at least 3 times each week for a minimum of 1 hour per session, possibly in study groups | |
| Significant increase in work load when preparing for assessments | |

Essential Mathematics Applied senior subject

Essential Mathematics' major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

Pathways

A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

Objectives

By the conclusion of the course of study, students will:

- select, recall and use facts, rules, definitions and procedures drawn from Number, Data, Location and time, Measurement and Finance
- comprehend mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number, Data, Location and time, Measurement and Finance.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|--|--|
| Number, data and graphs Fundamental topic: Calculations Number Representing data Graphs | Money, travel and data Fundamental topic: Calculations Managing money Time and motion Data collection | Measurement, scales and data Fundamental topic: Calculations Measurement Scales, plans and models Summarising and comparing data | Graphs, chance and loans Fundamental topic: Calculations Bivariate graphs Probability and relative frequencies Loans and compound interest |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. Schools develop three summative internal assessments and the common internal assessment (CIA) is developed by the QCAA.

English General senior subject

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perceptions of the world, and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in English promotes openmindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

General

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|--|--|--|
| Perspectives and texts Examining and creating perspectives in texts Responding to a variety of non-literary and literary texts Creating responses for public audiences and persuasive texts | Texts and culture Examining and shaping representations of culture in texts Responding to literary and non- literary texts, including a focus on Australian texts Creating imaginative and analytical texts | Textual connections Exploring connections between texts Examining different perspectives of the same issue in texts and shaping own perspectives Creating responses for public audiences and persuasive texts | Close study of literary texts Engaging with literary texts from diverse times and places Responding to literary texts creatively and critically Creating imaginative and analytical texts |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|--|-----|
| Summative internal assessment 1 (IA1): Extended response — written response for a public audience | 25% | Summative internal assessment 3 (IA3): Extended response — imaginative written response | 25% |
| Summative internal assessment 2 (IA2): Extended response — persuasive spoken response | 25% | Summative external assessment (EA): Examination — analytical written response | 25% |

| Study Requirements | Special Requirements |
|---|--|
| Students enrolled in this course must commit to developing and adhering to an independent study plan. It is expected that students will spend at least two hours per week independently reading and applying the skills taught in class. For units in which a novel is studied, up to five hours of independent reading per week may be required. This is essential for successful completion of the two year course. | Due to the large amount of technologically based assessment and classwork it is recommended that students are involved in the schools's BYOx program. |

Literature General senior subject

Literature focuses on the study of literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied literary texts.

Students engage with language and texts through a range of teaching and learning experiences to foster the skills to communicate effectively. They make choices about generic structures, language, textual features and technologies to participate actively in the dialogue and detail of literary analysis and the creation of imaginative and analytical texts in a range of modes, mediums and forms.

Students explore how literary texts shape perceptions of the world and enable us to enter the worlds of others. They explore ways in which literary texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in Literature promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

General

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|---|--|--|
| Introduction to literary studies Ways literary texts are received and responded to How textual choices affect readers Creating analytical and imaginative texts | Texts and culture Ways literary texts connect with each other — genre, concepts and contexts Ways literary texts connect with each other — style and structure Creating analytical and imaginative texts | Literature and identity Relationship between language, culture and identity in literary texts Power of language to represent ideas, events and people Creating analytical and imaginative texts | Independent explorations Dynamic nature of literary interpretation Close examination of style, structure and subject matter Creating analytical and imaginative texts |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|--|-----|
| Summative internal assessment 1 (IA1): Examination — analytical written response | 25% | Summative internal assessment 3 (IA3): Extended response — imaginative written response | 25% |
| Summative internal assessment 2 (IA2): Extended response — imaginative spoken/multimodal response | 25% | Summative external assessment (EA): • Examination — analytical written response | 25% |

English & Literature Extension(Year 12 only) General senior subject

English & Literature Extension is an extension of both the English (2019) and the Literature (2019) syllabuses and therefore offers more challenge than other English courses as it builds on the study students have already undertaken.

English & Literature Extension provides a theorised study of literature, to understand themselves and the potential of literature to expand the scope of their experiences. They ask critical questions about cultural assumptions, implicit values and differing world views encountered in an exploration of social, cultural and textual understandings about literary texts and the ways they might be interpreted and valued.

Students apply different theoretical approaches to analyse and evaluate a variety of literary texts and different ways readers might interpret these texts. They synthesise different interpretations and relevant theoretical approaches to produce written and spoken/signed extended analytical and evaluative texts. The nature of the learning in this subject provides opportunities for students to work independently on intellectually challenging tasks.

Pathways

A course of study in English & Literature Extension can establish a basis for further education and employment in a range of fields, and can lead to a range of careers in areas where understanding social, cultural and textual influences on ways of viewing the world is a key element, such as law, journalism, media, arts, curating, education, policy and human resources. It also provides a good introduction to the academic disciplines and fields of study that involve the application of methodologies based on theoretical understandings.

Objectives

By the conclusion of the course of study, students will:

- demonstrate understanding of literary texts studied to develop interpretation/s
- demonstrate understanding of different theoretical approaches to exploring meaning in texts
- demonstrate understanding of the relationships among theoretical approaches
- apply different theoretical approaches to literary texts to develop and examine interpretations
- analyse how different genres, structures and textual features of literary texts support different interpretations
- use appropriate patterns and conventions of academic genres and communication, including correct terminology, citation and referencing conventions
- use textual features in extended analytical responses to create desired effects for specific audiences
- evaluate theoretical approaches used to explore different interpretations of literary texts
- evaluate interpretations of literary texts, making explicit the theoretical approaches that underpin them
- synthesise analysis of literary texts, theoretical approaches and interpretations with supporting evidence.

Structure

To study English & Literature Extension, students should have completed Units 1 and 2 of either English or Literature. In Year 12, students undertake Units 3 and 4 of English & Literature Extension concurrently with, or after, Units 3 and 4 of English and/or Units 3 and 4 of Literature.

| Unit 3 | Unit 4 |
|--|---|
| Ways of readingReadings and defencesComplex transformation and defence | Exploration and evaluationExtended academic research paperApplication of theory |

Assessment

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|

| Students enrolled in this course must commit to developing and adhering to an independent study plan. It is expected that students will spend at least two hours per week independently reading and applying the skills taught in class. For units in which a novel is studied, up to five hours of independent reading per week may be required. This is essential for successful completion of the two year course. | Due to the large amount of technologically based assessment and classwork it is recommended that students are involved in the schools's BYOx program. |

Essential English Applied senior subject

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept or challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and workrelated contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and nonliterary texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

Objectives

By the conclusion of the course of study, students will:

Applied

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use modeappropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|--|---|
| Language that works Responding to a | Texts and human experiences | Language that influences | Representations and popular culture texts |
| variety of texts used in and developed for a work contextCreating multimodal and written texts | Responding to reflective and nonfiction texts that explore human experiences Creating spoken and written texts | Creating and shaping perspectives on community, local and global issues in texts Responding to texts that seek to influence audiences | Responding to popular culture texts Creating representations of Australian identifies, places, events and concepts |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. Schools develop three summative internal assessments and the common internal assessment (CIA) is developed by the QCAA.

| Unit 3 | Unit 4 |
|--|---|
| Summative internal assessment 1 (IA1): | Summative internal assessment 3 (IA3): |
| • Extended response — spoken/signed response | • Extended response — Multimodal response |
| Summative internal assessment 2 (IA2): | Summative internal assessment (IA4): |
| • Common internal assessment (CIA) | • Extended response — Written response |

| Study Requirements | Special Requirements |

Ancient History General senior subject

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life, and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research. General

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|---|---|
| Investigating the ancient world | Personalities in their time | Reconstructing the ancient world | People, power and authority |
| Digging up the past Ancient societies — Slavery Ancient societies — Art and architecture Ancient societies — Weapons and warfare Ancient societies — Technology and engineering Ancient societies — The family Ancient societies — Beliefs, rituals and funerary practices. | Hatshepsut Akhenaten Xerxes Perikles Alexander the Great Hannibal Barca Cleopatra Agrippina the Younger Nero Boudica Cao Cao Saladin (An-Nasir Salah ad-Din Yusuf ibn Ayyub) | Thebes — East and West, 18th Dynasty Egypt The Bronze Age Aegean Assyria from Tiglath Pileser III to the fall of the Empire Fifth Century Athens (BCE) Philip II and Alexander III of Macedon Early Imperial Rome Pompeii and Herculaneum | Schools choose one study of power from: Ancient Egypt — New Kingdom Imperialism Ancient Greece — the Persian Wars Ancient Greece — the Peloponnesian War Ancient Rome — the Punic Wars Ancient Rome — Civil War and the breakdown of the Republic QCAA will nominate one topic that will be the basis for an external examination from: |

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--------|--|---|--|
| | Richard the Lionheart Alternative choice of personality | and the Three Kingdoms • The 'Fall' of the Western Roman Empire • The Medieval Crusades | Thutmose III Rameses II Themistokles Alkibiades Scipio Africanus Caesar Augustus |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|---|-----|--|-----|
| Summative internal assessment 1 (IA1): Examination — essay in response to historical sources | 25% | Summative internal assessment 3 (IA3): Investigation — historical essay based on research | 25% |

|---|--|
| This is a research based General subject and will require significant commitment of time: | Students need to have access to: • Internet at home/local library |
| Three lessons per week face to face Individual study 2-3hours per week to complete | Computer at home and school |
| homework Individual time will be required to complete research assessment | Students need to have good reading, comprehension, writing and analytical skills and are expected to read widely and keep abreast of current events/news. |

Economics General senior subject

Economics encourages students to think deeply about the global challenges facing individuals, business and government, including how to allocate and distribute scarce resources to maximise well-being.

Students develop knowledge and cognitive skills to comprehend, apply analytical processes and use economic knowledge. They examine data and information to determine validity, and consider economic policies from various perspectives. They use economic models and analytical tools to investigate and evaluate outcomes to draw conclusions.

Students study opportunity costs, economic models and the market forces of demand and supply. They dissect and interpret the complex nature of international economic relationships and the dynamics of Australia's place in the global economy. They develop intellectual flexibility, digital literacy and economic thinking skills.

Pathways

A course of study in Economics can establish a basis for further education and employment in the fields of economics, econometrics, management, data analytics, business, accounting, finance, actuarial science, law and political science.

Economics is an excellent complement for students who want to solve real-world science or environmental problems and participate in government policy debates. It provides a competitive advantage for career options where students are aiming for management roles and developing their entrepreneurial skills to create business opportunities as agents of innovation.

Objectives

By the conclusion of the course of study, students will:

- comprehend economic concepts, principles and models
- select data and economic information from sources
- analyse economic issues
- evaluate economic outcomes
- create responses that communicate economic meaning.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|--|--|---|
| Markets and models The basic economic problem Economic flows Market forces | Modified markets Markets and efficiency Case options of market measures and strategies | International economics The global economy International economic issues | Contemporary macroeconomics Macroeconomic objectives and theory Economic management |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|
| Summative internal assessment 1 (IA1): • Examination — combination response | 25% | Summative internal assessment 3 (IA3): Examination — extended response to stimulus | 25% |
| Summative internal assessment 2 (IA2): • Investigation — research report | 25% | Summative external assessment (EA): • Examination — combination response | 25% |

| Study Requirements | Special Requirements |

| require significant commitment of time: | Internet at home/local library |
| Three lessons per week face to face | Computer at home and school |
| Individual study 2-3hours per week to complete homework Individual time will be required to complete research assessment | Students need to have good reading, comprehension, writing and analytical skills and are expected to read widely and keep abreast of current events/news. |

Geography General senior subject

Geography focuses on the significance of 'place' and 'space' in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data. environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

Objectives

By the conclusion of the course of study, students will:

- explain geographical processes
- comprehend geographic patterns
- analyse geographical data and information
- apply geographical understanding
- synthesise information from the analysis to propose action
- communicate geographical understanding.

Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|--|---|--|
| Responding to risk and vulnerability in hazard zones Natural hazard zones Ecological hazard zones | Planning sustainable places Responding to challenges facing a place in Australia Managing the challenges facing a megacity | Responding to land cover transformations Land cover transformations and climate change Responding to local land cover transformations | Managing population change Population challenges in Australia Global population change |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |

| research assessment 2 field excursions throughout the course of study are mandated by the syllabus assessment requirements | are expected to read widely and keep abreast of current events/news. |

Legal Studies General senior subject

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

Objectives

By the conclusion of the course of study, students will:

- comprehend legal concepts, principles and processes
- select legal information from sources
- analyse legal issues
- evaluate legal situations
- create responses that communicate meaning.

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|--|---|
| Beyond reasonable doubt Legal foundations Criminal investigation process Criminal trial process Punishment and sentencing | Balance of probabilities Civil law foundations Contractual obligations Negligence and the duty of care | Law, governance and change Governance in Australia Law reform within a dynamic society | Human rights in legal contexts Human rights The effectiveness of international law Human rights in Australian contexts |

Structure

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|

| Study Requirements | Special Requirements |
|--|--|
| This is a research based General subject and will require significant commitment of time: Three lessons per week face to face Individual study 2-3hours per week to complete homework Individual time will be required to complete research assessment Students will be required to complete assignment work in their own time. Some inclass time will be given to teach structures, genres, researching methods and analytical processes. | Students must have access to the internet at home or at a local library. Students must also be able to borrow resources from the school library at all times. Due to the large amount of technologically based assessment and classwork it is recommended that students are participants in the School's BYOx program. Students must also be prepared to participate in weekly handwritten extended response tasks. |

Modern History General senior subject

Modern History provides opportunities for students to gain historical knowledge and understanding about some of the main forces that have contributed to the development of the Modern World and to think historically and form a historical consciousness in relation to these same forces.

Modern History enables students to empathise with others and make meaningful connections between the past, present and possible futures.

Students learn that the past is contestable and tentative. Through inquiry into ideas, movements, national experiences and international experiences they discover how the past consists of various perspectives and interpretations.

Students gain a range of transferable skills that will help them become empathetic and critically-literate citizens who are equipped to embrace a multicultural, pluralistic, inclusive, democratic, compassionate and sustainable future.

Pathways

A course of study in Modern History can establish a basis for further education and employment in the fields of history, education, psychology, sociology, law, business, economics, politics, journalism, the media, writing, academia and strategic analysis.

Objectives

By the conclusion of the course of study, students will:

• comprehend terms, issues and concepts

General

- devise historical questions and conduct research
- analyse historical sources and evidence
- synthesise information from historical sources and evidence
- evaluate historical interpretations
- create responses that communicate meaning.

Students must also be prepared to participate in weekly handwritten extended response tasks. |

Business Studies Applied senior subject

Business Studies provides opportunities for students to develop practical business knowledge, understanding and skills for use, participation and work in a range of business contexts.

Students develop their business knowledge and understanding through applying business practices and business functions in business contexts, analysing business information and proposing and implementing outcomes and solutions in business contexts.

Students develop effective decision-making skills and learn how to plan, implement and evaluate business outcomes and solutions, resulting in improved economic, consumer and financial literacy.

Pathways

A course of study in Business Studies can establish a basis for further education and employment in office administration, data entry, retail, sales, reception, small business, finance administration, public relations, property management, events administration and marketing.

Objectives

By the end of the course of study, students should:

Applied

- describe concepts and ideas related to business functions
- explain concepts and ideas related to business functions
- demonstrate processes, procedures and skills related to business functions to complete tasks
- analyse business information related to business functions and contexts
- apply knowledge, understanding and skills related to business functions and contexts
- use language conventions and features to communicate ideas and information
- make and justify decisions for business solutions and outcomes
- plan and organise business solutions and outcomes
- evaluate business decisions, solutions and outcomes.

Structure

The Business Studies course is designed around core and elective topics. The elective learning occurs through business contexts. Business Studies may be replaced by a Certificate III in Events.

| Core topics | Elective topics | |
|--|---|---|
| Business practices, consisting of Business fundamentals, Financial literacy, Business communication and Business technology | Entertainment Events management Financial services Health and well-being | Not-for-profit Real estate Retail Rural |
| Business functions, consisting of Working in administration, Working in finance, Working with customers and Working in | InsuranceLegalMediaMining | Sports management Technical, e.g. manufacturing, construction, engineering |

| marketing | Tourism |
|-----------|---------|
| | Travel |

For Business Studies, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from at least three different assessment techniques, including:

- at least one project
- no more than two assessment instruments from any one technique.

| Project | Extended response | Examination |
|--|--|--|
| A response to a single task, situation and/or scenario. | A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials. | A response that answers a number of provided questions, scenarios and/or problems. |
| At least two different components from the following: • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • performance: continuous class time • product: continuous class time. | Presented in one of the following modes: written: 600–1000 words spoken: 3–4 minutes multimodal: 4–7 minutes. | 60–90 minutes 50–250 words per item on the test |

| Study Requirements | Special Requirements |
|---|---|
| This is a research based General subject and will require significant commitment of time: Three lessons per week face to face Individual study 2-3hours per week to complete homework Individual time will be required to complete research assessment | Students need to have access to: • Internet at home/local library • Computer at home and school Students need to have good reading, comprehension, writing and analytical skills and are expected to read widely and keep abreast of current events/news. |

Design General senior subject

Design focuses on the application of design thinking to envisage creative products, services and environments in response to human needs, wants and opportunities. Designing is a complex and sophisticated form of problem-solving that uses divergent and convergent thinking strategies that can be practised and improved. Designers are separated from the constraints of production processes to allow them to appreciate and exploit new innovative ideas.

Students learn how design has influenced the economic, social and cultural environment in which they live. They understand the agency of humans in conceiving and imagining possible futures through design. Collaboration, teamwork and communication are crucial skills needed to work in design teams and liaise with stakeholders. They learn the value of creativity and build resilience as they experience iterative design processes, where the best ideas may be the result of trial and error and a willingness to take risks and experiment with alternatives.

Students learn about and experience design through exploring needs, wants and opportunities; developing ideas and design concepts; using drawing and low-fidelity prototyping skills; and evaluating ideas and design concepts. They communicate design proposals to suit different audiences.

Pathways

A course of study in Design can establish a basis for further education and employment in the fields of architecture, digital media design, fashion design, graphic design, industrial design, interior design and landscape architecture.

Objectives

By the conclusion of the course of study, students will:

- describe design problems and design criteria
- represent ideas, design concepts and design information using drawing and low-fidelity prototyping
- analyse needs, wants and opportunities using data
- devise ideas in response to design problems
- synthesise ideas and design information to propose design concepts
- evaluate ideas and design concepts to make refinements
- make decisions about and use modeappropriate features, language and conventions for particular purposes and contexts.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|---|--|
| Design in practiceExperiencing designDesign processDesign styles | Commercial design Explore — client needs and wants Develop — collaborative design | Human-centred designDesigning with empathy | Sustainable design Explore — sustainable design opportunities Develop — redesign |

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|
| Summative internal assessment 1 (IA1): • Examination — design challenge | 15% | Summative internal assessment 3 (IA3): • Project | 25% |
| Summative internal assessment 2 (IA2): • Project | 35% | Summative external assessment (EA): • Examination — design challenge | 25% |

| Study Requirements | Special Requirements |
|--|--|
| This is a General subject and as such requires a significant commitment of time and energy to complete the course successfully. This includes: Three lessons per week face to face teaching Individual/study group/tutorial sessions up to 3 hours per week Students may be required to complete additional work in their own time during the independent inquiry assessment. | Students will need to have 21st century skills in critical and creative thinking, communication and collaboration. They will need to have good personal, social and ICT skills needed to work in design teams and liaise with stakeholders. Due to large amount of research and design in this subject, it is recommended that students are participants in the School's BYOx program |

Hospitality Practices Applied senior subject

Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service.

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

Objectives

By the conslusion of the course of study, students should:

• explain concepts and ideas from the food and beverage sector

Applied

- describe procedures in hospitality contexts from the food and beverage sector
- examine concepts and ideas and procedures related to industry practices from the food and beverage sector
- apply concepts and ideas and procedures when making decisions to produce products and perform services for customers
- use language conventions and features to communicate ideas and information for specific purposes.
- plan, implement and justify decisions for events in hospitality contexts
- critique plans for, and implementation of, events in hospitality contexts
- evaluate industry practices from the food and beverage sector.

Structure

The Hospitality Practices course is designed around core topics embedded in a minimum of two elective topics.

| Core topics | Elective topics |
|---|--|
| Navigating the hospitality industryWorking effectively with othersHospitality in practice | Kitchen operationsBeverage operations and serviceFood and beverage service |

For Hospitality Practices, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects
- at least one investigation or an extended response.

| Project | Investigation | Extended response | Examination |
|---|--|--|--|
| A response to a single task, situation and/or scenario. | A response that includes locating and using information beyond students' own knowledge and the data they have been given. | A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials. | A response that answers a number of provided questions, scenarios and/or problems. |
| A project consists of a product and performance component and one other component from the following: • written: 500–900 words • spoken: 2½–3½ minutes • multimodal: 3–6 minutes • product and performance: continuous class time | Presented in one of the following modes: • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. | Presented in one of the following modes: • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. | 60–90 minutes 50–250 words per item |

Industrial Technology Skills Applied senior subject

Industrial Technology Skills focuses on the practices and processes required to manufacture products in a variety of industries.

Students understand industry practices; interpret specifications, including technical information and drawings; demonstrate and apply safe, practical production processes with hand/power tools and machinery; communicate using oral, written and graphical modes; organise, calculate and plan production processes; and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways

A course of study in Industrial Technology Skills can establish a basis for further education and employment in manufacturing industries. Employment opportunities may be found in the industry areas of aeroskills, automotive, building and construction, engineering, furnishing, industrial graphics and plastics.

Objectives

By the conclusion of the course of study, students should:

- describe industry practices in manufacturing tasks
- demonstrate fundamental production skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.

Structure

The Industrial Technology Skills course is designed around:

- · core topics, which are integrated throughout the course
- elective topics, organised in industry areas, and manufacturing tasks related to the chosen electives.

| Core topics | Industry area | Elective topics | |
|---|---------------|--|--|
| Industry practicesProduction processes | Aeroskills | Aeroskills mechanicalAeroskills structures | |
| | Automotive | Automotive mechanicalAutomotive body repairAutomotive electrical | |

| Building and construction | Bricklaying Plastering and painting Concreting Carpentry Tiling Landscaping |
|---------------------------|--|
| Engineering | Sheet metal workingWelding and fabricationFitting and machining |
| Furnishing | Cabinet-making Furniture finishing Furniture-making Glazing and framing Upholstery |
| Industrial graphics | Engineering draftingBuilding and construction draftingFurnishing drafting |
| Plastics | Thermoplastics fabricationThermosetting fabrication |

For Industrial Technology Skills, assessment from Units 3 and 4 is used to determine the student's exit result, and this consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

| Project | Practical demonstration | Examination |
|---|---|--|
| A response to a single task, situation and/or scenario. | A task that assesses the practical application of a specific set of teacher-identified production skills and procedures. | A response that answers a number of provided questions, scenarios and/or problems. |
| A project consists of a product component and at least one of the following components: • written: 500–900 words • spoken: 2½–3½ minutes • multimodal - non-presentation: 8 A4 pages max (or equivalent) - presentation: 3–6 minutes • product: continuous class time. | Students demonstrate production skills and procedures in class under teacher supervision. | 60–90 minutes 50–250 words per item |

| Study Requirements | Special Requirements |
|---|--|
| Students are expected to complete three lessons face to face, as well as attend tutorial time to access specialist equipment as and when required. Generally two lessons per week involves practical work. Students will need to ensure they are following teacher advice regarding timelines and additional attendance at tutorials to complete set work. | Whilst in the workshops, safety glasses, protective aprons and enclosed leather shoes must be worn at all times. Furthermore, all long hair must be tied back or enclosed in hair nets. Jewellery must be removed. |

Engineering Skills

Applied senior subject

Engineering Skills focuses on the underpinning industry practices and production processes required to create, maintain and repair predominantly metal products in the engineering manufacturing industry.

Students understand industry practices, interpret specifications, including technical information and drawings, demonstrate and apply safe and practical production processes with hand/power tools and machinery, communicate using oral, written and graphical modes, organise, calculate and plan production processes and evaluate the products they create using predefined specifications.

Students develop transferable skills by engaging in manufacturing tasks that relate to business and industry, and that promote adaptable, competent, self-motivated and safe individuals who can work with colleagues to solve problems and complete practical work.

Pathways

A course of study in Engineering Skills can establish a basis for further education and employment in engineering trades. With additional training and experience, potential employment opportunities may be found, for example, as a sheet metal worker, metal fabricator, welder, maintenance fitter, metal machinist, locksmith, air-conditioning mechanic, refrigeration mechanic or automotive mechanic.

Objectives

By the conclusion of the course of study, students should:

Applied

- describe industry practices in manufacturing tasks
- demonstrate fundamental production
 skills
- interpret drawings and technical information
- analyse manufacturing tasks to organise materials and resources
- select and apply production skills and procedures in manufacturing tasks
- use visual representations and language conventions and features to communicate for particular purposes
- plan and adapt production processes
- create products from specifications
- evaluate industry practices, production processes and products, and make recommendations.

Structure

The Engineering Skills course is designed around core and elective topics.

| Core topics | Elective topics |
|---|---|
| Industry practicesProduction processes | Fitting and machiningSheet metal workingWelding and fabrication |

For Engineering Skills, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- at least two projects
- at least one practical demonstration (separate to the assessable component of a project).

| Project | Practical demonstration | Examination |
|--|---|--|
| A response to a single task, situation and/or scenario. | A task that assesses the practical application of a specific set of teacher-identified production skills and procedures. | A response that answers a number of provided questions, scenarios and/or problems. |
| A project consists of a product component and at least one of the following components: • written: 500–900 words • spoken: 2½–3½ minutes • multimodal - non-presentation: 8 A4 pages max (or equivalent) - presentation: 3–6 minutes • product: continous class time. | Students demonstrate production skills and procedures in class under teacher supervision. | 60–90 minutes 50–250 words per item |

Physical Education General senior subject

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Students learn experientially through three stages of an inquiry approach to make connections between the scientific bases and the physical activity contexts. They recognise and explain concepts and principles about and through movement, and demonstrate and apply body and movement concepts to movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching. General

Objectives

By the conclusion of the course of study, students will:

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|---|---|--|
| Motor learning, functional anatomy, biomechanics and | Sport psychology, equity and physical activity | Tactical awareness, ethics and integrity and physical activity | Energy, fitness and training and physical activity |
| physical activity Motor learning integrated with a selected physical activity Functional anatomy and biomechanics integrated with a selected physical activity | Sport psychology integrated with a selected physical activity Equity — barriers and enablers | Tactical awareness integrated with one selected 'Invasion' or 'Net and court' physical activity Ethics and integrity | Energy, fitness and training integrated with one selected 'Invasion', 'Net and court' or 'Performance' physical activity |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Summative internal assessment 2 (IA2): • Investigation — report | 20% | Summative external assessment (EA): • Examination — combination response | 25% |

| Study Requirements | Special Requirements |
|---|--|
| This is a research based General subject and will require significant commitment of time: Three lessons per week face to face Individual study 2-3hours per week to complete homework | Students need to have access to: Internet at home/local library Computer at home and school Students need to have good reading, comprehension, writing, analytical and evaluative skills and are expected to read widely. A pass in English is necessary. |

Health General senior subject

Health provides students with a contextualised strengths-based inquiry of the various determinants that create and promote lifelong health, learning and active citizenship. Drawing from the health, behavioural, social and physical sciences, the Health syllabus offers students an action, advocacy and evaluation-oriented curriculum.

Health uses an inquiry approach informed by the critical analysis of health information to investigate sustainable health change at personal, peer, family and community levels.

Students define and understand broad health topics, which they reframe into specific contextualised health issues for further investigation.

Students plan, implement, evaluate and reflect on action strategies that mediate, enable and advocate change through health promotion.

Pathways

A course of study in Health can establish a basis for further education and employment in the fields of health science, public health, health education, allied health, nursing and medical professions.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe information about health-related topics and issues
- comprehend and use health approaches and frameworks
- analyse and interpret information about health-related topics and issues
- critique information to distinguish determinants that influence health status
- organise information for particular purposes
- investigate and synthesise information to develop action strategies
- evaluate and reflect on implemented action strategies to justify recommendations that mediate, advocate and enable health promotion
- make decisions about and use modeappropriate features, language and conventions for particular purposes and contexts.

Sport & Recreation Applied senior subject

Sport & Recreation provides students with opportunities to learn in, through and about sport and active recreation activities, examining their role in the lives of individuals and communities.

Students examine the relevance of sport and active recreation in Australian culture, employment growth, health and wellbeing. They consider factors that influence participation in sport and recreation, and how physical skills can enhance participation and performance in sport and recreation activities. Students explore how interpersonal skills support effective interaction with others, and the promotion of safety in sport and recreation activities. They examine technology in sport and recreation activities, and how the sport and recreation industry contributes to individual and community outcomes.

Students are involved in acquiring, applying and evaluating information about and in physical activities and performances, planning and organising activities, investigating solutions to individual and community challenges, and using suitable technologies where relevant. They communicate ideas and information in, about and through sport and recreation activities. They examine the effects of sport and recreation on individuals and communities, investigate the role of sport and recreation in maintaining good health, evaluate strategies to promote health and safety, and investigate personal and interpersonal skills to achieve goals.

Pathways

A course of study in Sport & Recreation can establish a basis for further education and employment in the fields of fitness, outdoor recreation and education, sports administration, community health and recreation and sport performance.

Objectives

By the conclusion of the course of study, students should:

Applied

- demonstrate physical responses and interpersonal strategies in individual and group situations in sport and recreation activities
- describe concepts and ideas about sport and recreation using terminology and examples
- explain procedures and strategies in, about and through sport and recreation activities for individuals and communities
- apply concepts and adapt procedures, strategies and physical responses in individual and group sport and recreation activities
- manage individual and group sport and recreation activities
- apply strategies in sport and recreation activities to enhance health, wellbeing, and participation for individuals and communities
- use language conventions and textual features to achieve particular purposes
- evaluate individual and group physical responses and interpersonal strategies to improve outcomes in sport and recreation activities
- evaluate the effects of sport and recreation on individuals and communities
- evaluate strategies that seek to enhance health, wellbeing, and participation in sport and recreation activities and provide recommendations
- create communications that convey meaning for particular audiences and purposes.

Structure

The Sport & Recreation course is designed around core and elective topics.

| Core topics | Elective topics |
|---|--|
| Sport and recreation in the community Sport, recreation and healthy living Health and safety in sport and recreation activities Personal and interpersonal skills in sport and recreation activities | Active play and minor games Challenge and adventure activities Games and sports Lifelong physical activities Rhythmic and expressive movement activities Sport and recreation physical activities |

Assessment

For Sport & Recreation, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments, including:

- one project (annotated records of the performance is also required)
- one investigation, extended response or examination.

| Project | Investigation | Extended response | Performance | Examination |
|--|--|--|---|---|
| A response to a single task, situation and/or scenario. | A response that includes locating and using information beyond students' own knowledge and the data they have been given. | A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials. | A response involves the application of identified skill/s when responding to a task that involves solving a problem, providing a solution, providing instruction or conveying meaning or intent. | A response that answers a number of provided questions, scenarios and/or problems. |
| At least two different components from the following: • written: 500– 900 words • spoken: 2½– 3½ minutes • multimodal: 3– 6 minutes • performance: 2–4 minutes.* | Presented in one of the following modes: • written: 600– 1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. | Presented in one of the following modes: • written: 600–1000 words • spoken: 3–4 minutes • multimodal: 4–7 minutes. | • 2–4 minutes* | 60–90 minutes 50–250 words per item |

* Evidence must include annotated records that clearly identify the application of standards to performance.

Biology General senior subject

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life; respect for all living things and the environment; understanding of biological systems, concepts, theories and models; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out fieldwork, laboratory and other research investigations; interpret evidence; use sound, evidencebased arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

Structure

Students must also be able to borrow texts from the school library at all times. Due to the large amount of technologically based assessment and classwork it is recommended that students are participants in the School's BYOx program. |
| Students may be required to complete experimental work in their own time in order to complete their assessment. | |

Chemistry General senior subject

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicate understandings, findings, arguments and conclusions.

| Students may be required to complete experimental work in their own time in order to complete their assessment. | |

Physics General senior subject

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes; and about the concepts and theories that predict and describe the linear motion of objects. Further, they explore how scientists explain some phenomena using an understanding of waves. They engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. They study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Students develop appreciation of the contribution physics makes to society: understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that natter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. General

Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

Psychology General senior subject

Psychology provides opportunities for students to engage with concepts that explain behaviours and underlying cognitions.

Students examine individual development in the form of the role of the brain, cognitive development, human consciousness and sleep. They investigate the concept of intelligence; the process of diagnosis and how to classify psychological disorder and determine an effective treatment; and the contribution of emotion and motivation on individual behaviour. They examine individual thinking and how it is determined by the brain, including perception, memory, and learning. They consider the influence of others by examining theories of social psychology, interpersonal processes, attitudes and cross-cultural psychology.

Students learn and apply aspects of the knowledge and skill of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Psychology can establish a basis for further education and employment in the fields of psychology, sales, human resourcing, training, social work, health, law, business, marketing and education. General

Objectives

By the conclusion of the course of study, students will:

- describe and explain scientific concepts, theories, models and systems and their limitations
- apply understanding of scientific concepts, theories, models and systems within their limitations
- analyse evidence
- interpret evidence
- investigate phenomena
- evaluate processes, claims and conclusions
- communicates understandings, findings, arguments and conclusions.

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|--|---|---|
| Individual development • Psychological science A • The role of the brain • Cognitive development • Human consciousness and sleep | Individual behaviour Psychological science B Intelligence Diagnosis Psychological disorders and treatments Emotion and motivation | Individual thinking Localisation of function in the brain Visual perception Memory Learning | The influence of others Social psychology Interpersonal processes Attitudes Cross-cultural psychology |

Structure

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | | |
|---|-----|--|-----|--|

| Summative external assessment (EA): 50% • Examination | | | | |

Japanese General senior subject

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions and justify opinions, ideas and perspectives
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- use strategies to maintain communication and exchange meaning in Japanese.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|---|---|---|---|
| 私のくらし My world • Family/carers and friends • Lifestyle and leisure • Education | 私達のまわり Exploring our world • Travel • Technology and media • The contribution of Japanese culture to the world | 私達の社会 Our society • Roles and relationships • Socialising and connecting with my peers • Groups in society | 私の将来 My future • Finishing secondary school, plans and reflections • Responsibilities and moving on |

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|--|-----|---|-----|

| Study Requirements | Special Requirements |
|---|---|
| This is a General subject and as such requires a significant commitment of time and energy to complete the course successfully. This includes: Three lessons per week face to face teaching. Individual/study group/tutorial sessions 1-2 hours per week. | Students need to have access to: Internet at home/local library Computer at home and school |

Drama General senior subject

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students' knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems, and work independently and collaboratively.

Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology. General

Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- analyse how dramatic languages are used to create dramatic action and meaning
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|--|--|--|
| Share How does drama promote shared understandings of the human experience? cultural inheritances of storytelling oral history and emerging practices a range of linear and non-linear forms | Reflect How is drama shaped to reflect lived experience? Realism, including Magical Realism, Australian Gothic associated conventions of styles and texts | Challenge How can we use drama to challenge our understanding of humanity? Theatre of Social Comment, including Theatre of the Absurd and Epic Theatre associated conventions of styles and texts | Transform How can you transform dramatic practice? Contemporary performance associated conventions of styles and texts inherited texts as stimulus |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 Summative internal assessment 3 (IA3): 35% | | |
|---|-----|--|-----|--|
| Summative internal assessment 1 (IA1): • Performance | 20% | Summative internal assessment 3 (IA3): • Project — practice-led project | 35% | |
| Summative internal assessment 2 (IA2): • Project — dramatic concept | 20% | | | |
| Summative external assessment (EA): 25% Examination — extended response | | | | |

| Study Requirements | Special Requirements |
|---|--|
| Due to the nature of Drama, students who select this subject will be required to attend extra rehearsals for group performances in their own time. The public performance also requires students to participate in a one night time performance. Students will also view live theatre as per assessment, which could include time outside of school hours, and include travel to Brisbane. | Due to the large amount of technologically based assessment and classwork, it is recommended that students are participants in the School's BYOx program. |

Drama in Practice

Applied senior subject

Drama in Practice gives students opportunities to plan, create, adapt, produce, perform, appreciate and evaluate a range of dramatic works or events in a variety of settings.

Students participate in learning activities that apply knowledge and develop creative and technical skills in communicating meaning to an audience.

Students learn essential workplace health and safety procedures relevant to the drama and theatre industry, as well as effective work practices and industry skills needed by a drama practitioner.

Pathways

A course of study in Drama in Practice can establish a basis for further education and employment in the drama and theatre industry in areas such as performance, theatre management and promotions.

- identify and explain dramatic principles and practices
- interpret and explain dramatic works and dramatic meanings
- demonstrate dramatic principles and practices
- apply dramatic principles and practices when engaging in drama activities and/or with dramatic works
- analyse the use of dramatic principles and practices to communicate meaning for a purpose
- use language conventions and features and terminology to communicate ideas and information about drama, according to purposes
- plan and modify dramatic works using dramatic principles and practices to achieve purposes
- create dramatic works that convey meaning to audiences
- evaluate the application of dramatic principles and practices to drama activities or dramatic works.

Objectives

By the conclusion of the course of study, students should:

Structure

The Drama in Practice course is designed around core and elective topics.

| Core | Electives | |
|---|--|---|
| Dramatic principles Dramatic practices | Acting (stage and screen) Career pathways (including arts entrepreneurship) Community theatre Contemporary theatre Directing Playbuilding | Scriptwriting Technical design and production The theatre industry Theatre through the ages World theatre |

For Drama in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of *four* instruments, including:

- at least one project, arising from community connections
- at least one performance (acting), separate to an assessable component of a project.

| Project | Performance | Product | Extended response | Investigation |
|---|--|---|---|--|
| A response to a single task, situation and/or scenario that contains two or more components. | A technique that assesses the physical demonstration of identified skills. | A technique that assesses the production of a design solution. | A technique that assesses the interpretation, analysis/examination and/or evaluation of ideas and information in provided stimulus materials. | A response that includes locating and using information beyond students' own knowledge and the data they have been given. |
| At least two different components from the following: • written: $500-900$ words • spoken: $2\frac{1}{2}-3\frac{1}{2}$ minutes • multimodal - non- presentation: 8 A4 pages max (or equivalent) - presentation: 3-6 minutes • performance onstage (stage acting) - 2-4 minutes: individual - $1\frac{1}{2}-3$ minutes: group • performance onstage (screen acting) - 2-3 minutes: individual - $1\frac{1}{2}-2\frac{1}{2}$ minutes: group • performance offstage (directing, designing) - 4-6 minutes: individual (excluding actors delivering text) | acting performance (stage) - 3–5 minutes: individual 2–4 minutes: group acting performance (screen) - 2½–3½ minutes: individual 2–3 minutes: group directing performance - 5–7 minutes: individual (excluding actors delivering text) | variable conditions | Presented in one of the following modes: • written: 600–1000 words • spoken: 3–4 minutes • multimodal - non-presentation: 10 A4 pages max (or equivalent) - presentation: 4–7 minutes. | Presented in one of the following modes: • written: 600– 1000 words • spoken: 3–4 minutes • multimodal - non- presentation: 10 A4 pages max (or equivalent) - presentation: 4–7 minutes. |

| Project | Performance | Product | Extended response | Investigation |
|--|-------------|---------|----------------------|---------------|
| workshop performance (other): variable conditions product: variable conditions. | | | | |

Film, Television & New Media General senior subject

Film, Television & New Media fosters creative and expressive communication. It explores the five key concepts of technologies, representations, audiences, institutions and languages.

Students learn about film, television and new media as our primary sources of information and entertainment. They understand that film, television and new media are important channels for educational and cultural exchange, and are fundamental to our selfexpression and representation as individuals and as communities.

Students creatively apply film, television and new media key concepts to individually and collaboratively make moving-image media products, and investigate and respond to moving-image media content and production contexts. Students develop a respect for diverse perspectives and a critical awareness of the expressive, functional and creative potential of moving-image media in a diverse range of global contexts. They develop knowledge and skills in creative thinking, communication, collaboration, planning, critical analysis, and digital and ethical citizenship.

Pathways

A course of study in Film, Television & New Media can establish a basis for further education and employment in the fields of information technologies, creative industries, cultural institutions, and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, film and television, and public relations.

Objectives

By the conclusion of the course of study, students will:

- explain the features of moving-image media content and practices
- symbolise conceptual ideas and stories
- construct proposals and construct moving-image media products
- apply literacy skills
- analyse moving-image products and contexts of production and use
- structure visual, audio and text elements to make moving-image media products
- experiment with ideas for moving-image media products
- appraise film, television and new media products, practices and viewpoints
- synthesise visual, audio and text elements to solve conceptual and creative problems.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|---|--|--|
| Foundation | Story forms | Participation | Identity |
| Concept: technologies How are tools and associated processes used to create | Concept: representations How do representations function in story forms? | • Concept: technologies How do technologies enable or constrain participation? | • Concept: technologies How do media artists experiment with technological practices? |
| meaning? Concept: institutions How are institutional practices influenced by social, political and economic factors? | • Concept: audiences How does the relationship between story forms and meaning change in different contexts? | • Concept: audiences How do different contexts and purposes impact the participation of individuals and cultural groups? | Concept: representations How do media artists portray people, places, events, ideas and emotions? |
| • Concept: languages How do signs and symbols, codes and conventions create meaning? | • Concept: languages How are media languages used to construct stories? | • Concept: institutions How is participation in institutional practices influenced by social, political and economic factors? | • Concept: languages How do media artists use signs, symbols, codes and conventions in experimental ways to create meaning? |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | | |
|---|-----|---|-----|--|
| Summative internal assessment 1 (IA1): • Case study investigation | 15% | Summative internal assessment 3 (IA3): • Stylistic project | 35% | |
| Summative internal assessment 2 (IA2): • Multi-platform project | 25% | | | |
| Summative external assessment (EA): 25% • Examination — extended response | | | | |

| Study Requirements | Special Requirements |
|---|---|
| This is a General subject and as such requires a significant commitment of time and energy to complete the course successfully. This includes: Three lessons per week face to face teaching. Individual/study group/tutorial sessions 1-2 hours per week. A significant amount of a student's own time will be required to complete filming and editing requirements of this course. | Students need to have access to: Internet at home/local library Computer at home and school |

Music General senior subject

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills, and analyse and evaluate music in a variety of contexts, styles and genres.

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- demonstrate technical skills
- explain music elements and concepts
- use music elements and concepts
- analyse music
- apply compositional devices
- apply literacy skills
- interpret music elements and concepts
- evaluate music to justify the use of music elements and concepts
- realise music ideas
- resolve music ideas.

Structure

| Unit 1 | Unit 2 | Unit 3 | Unit 4 |
|--|--|--|---|
| Designs Through inquiry learning, the following is explored: | Identities Through inquiry learning, the following is explored: | Innovations Through inquiry learning, the following is explored: | Narratives Through inquiry learning, the following is explored: |
| How does the treatment and combination of different music elements enable musicians to design music that communicates meaning through performance and composition? | How do musicians use their understanding of music elements, concepts and practices to communicate cultural, political, social and personal identities when performing, composing and responding to music? | How do musicians incorporate innovative music practices to communicate meaning when performing and composing? | How do musicians manipulate music elements to communicate narrative when performing, composing and responding to music? |

Assessment

Schools devise assessments in Units 1 and 2 to suit their local context.

In Units 3 and 4 students complete four summative assessments. The results from each of the assessments are added together to provide a subject score out of 100. Students will also receive an overall subject result (A–E).

| Unit 3 | | Unit 4 | |
|---|-----|--|-----|
| Summative internal assessment 1 (IA1): • Performance | 20% | Summative internal assessment 3 (IA3): • Integrated project | 35% |
| Summative internal assessment 2 (IA2): • Composition | 20% | | |
| Summative external assessment (EA): 25% • Examination | | | |

| Study Requirements | Special Requirements |
|--|---|
| This is a General subject and, as such, requires a significant commitment of time and energy to complete the course successfully. This includes: Three lessons per week face-to-face teaching. Individual/practice/tutorial sessions 1-2 hours per week. Students will be required to practise in groups and as a solo artist in their own time both at school and at home in order to complete their assessment work | Students must have access to the internet at home or at a local library. Students must also be able to borrow texts from the school library at all times. Students must be able to play an instrument to performance standard or sing confidently to an audience with an accompanist. The ability to read music from the staff, TAB or chord charts is also required. Due to the large amount of technologically based assessment and classwork it is recommended that students are participants in the School's BYOx program. |

Music Extension (Composition) Year 12 Only General senior subject

Music Extension (Composition) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Composition specialisation (making), students create and resolve new music works. They demonstrate use of music concepts and manipulate music concepts to express meaning and/or emotion to an audience through resolved compositions. creative industries, public relations and science and technology.

General

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply compositional devices
- manipulate music elements and concepts
- resolve music ideas.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education,

Music Extension (Musicology) Year 12 Only General senior subject

Music Extension (Musicology) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Musicology specialisation (responding), students investigate and analyse music works and ideas. They synthesise analytical information about music, and document sources and references about music to support research.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- analyse music
- investigate music
- synthesise information.

Structure

| Unit 3 | Unit 4 |

Music Extension (Performance) Year 12 Only General senior subject

Music Extension (Performance) is an extension of the Music General senior syllabus. It provides an opportunity for students with specific abilities in music to extend their expertise. Students select one specialisation only, and follow an individual program of study designed to continue the development of refined musicianship skills. Music Extension encourages students to investigate music concepts and ideas relevant to their specialisation.

In the Performance specialisation (making), students realise music works, demonstrating technical skills and understanding. They make decisions about music, interpret music elements and concepts, and express music ideas to realise their performances. creative industries, public relations and science and technology.

Objectives

By the conclusion of the course of study, students will:

- apply literary skills
- evaluate music and ideas about music
- examine music and ideas about music
- express meaning, emotion or ideas about music
- apply technical skills
- interpret music elements and concepts
- realise music ideas.

Pathways

A course of study in Music Extension can establish a basis for further education and employment in the fields of arts administration, communication, education,

Visual Art General senior subject

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and communities to enrich their experiences and understandings of their own and others' art practices.

Students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. They use their imagination and creativity to innovatively solve problems and experiment with visual language and expression.

Through an inquiry learning model, students develop critical and creative thinking skills. They create individualised responses and meaning by applying diverse materials, techniques, technologies and art processes.

In responding to artworks, students employ essential literacy skills to investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas.

Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

Objectives

By the conclusion of the course of study, students will:

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate art practices, traditions, cultures and theories
- justify viewpoints
- experiment in response to stimulus
- create meaning through the knowledge and understanding of materials, techniques, technologies and art processes
- realise responses to communicate meaning.

Structure

| Study Requirements | Special Requirements |
|---|---|
| This is a General subject and, as such, requires a significant commitment of time and energy to complete the course successfully. This includes: Three lessons per week face-to-face teaching. Individual/practice/tutorial sessions 1-2 hours per week. Students will be required to work on and complete their art projects often outside of school hours. | Students must have access to the internet at home or at a local library. Students must also be able to borrow texts from the school library at all times. As part of this course students may be required to respond to an experience such as an excursion or a camp. Due to the large amount of technologically based assessment and classwork it is recommended that students are participants in the School's BYOx program. |

Vocational Education

Vocational Education at Maleny State High School can occur within a VET Certificate or through a school based traineeship/apprenticeship. Both forms of Vocational Education can contribute to the QCE. VET Certificates are designed to enhance literacy and numeracy skills for work, or to provide learning experiences similar to those within a particular industry. A Certificate III qualification can contribute towards an ATAR.

Courses marked with the National Recognised Training logo are certificate courses and contain nationally accredited vocational, educational and training competencies. These competencies are authorised under the Australian Qualifications Framework (AQF).

Maleny State High School is a Registered Training Organization: RTO number 30395. All qualifications at Maleny State High School are of a Certificate I or Certificate II level. All certificates have a strong industry training component. At present our scope of registration includes qualifications from the following training package areas:

- Agriculture, Horticulture and Conservation and Land Management
- Creative Arts and Culture
- Foundation Skills
- Furnishing

Disclaimer – All vocation courses require specialist trainers and equipment to facilitate the course. The school retains the right to cancel/suspend a vocational course if it is unable to meet the human or physical resource requirements and the school is unable to provide an alternative arrangement. In addition, all VET Certificate courses are offered, subject to approval from the Queensland Curriculum Assessment Authority or the Australia Skills Quality Authority.

| TRAINING PACKAGE | VET QUALIFICATION TITLE and CODE | YEAR LEVELS |
|--|--|------------------------------|
| Agriculture, Horticulture and Conservation and Land Management | AHC20216 - Cert II in Rural Operations AHC10216 - Cert I in AgriFood Operations | Years 11 & 12 Year 10 |
| Creative Arts and Culture | CUA20715 - Cert II in Visual Arts CUA20620 - Cert II in Music | Year 11 & 12 Year 11 & 12 |
| Furnishing | MSF10113 - Certificate I Furnishing | Year 10 |
| Foundation Skills | FSK20119 - Cert II in Skills for Work and Vocational Pathways | Year 10,11 &12 |
| Business Services | BSB20120 - Certificate II in Workplace Skills | Year 10,11 &12 |
| Tourism, Travel and Hospitality | SIT30516 – Certificate III in Events | Year 11 & 12 |

Assessment in the certificates above is competency based. This means that students do not receive a level of achievement from VHA to VLA at exit or A-E on reports. Instead, progress is indicated as "WTC – Working Towards Competency, with successful students exiting with the appropriate certificate(s) listed on their Statement of Attainment (Partial Completion) or Qualification Certificate (Full Completion).

STUDENTS SHOULD CONSULT THE VET STUDENT HANDBOOK BEFORE SELECTION OF A VET COURSE. These books are available on the Maleny State High School Website

VETiS (VET in Schools)

What is VETiS

A core element of the Queensland Government's Working Queensland jobs plan is ensuring students have access to quality training programs that deliver effective skills to meet employment and business demands.

Vocational Education and Training in Schools (VETiS) supports this aim by the delivery of nationally recognised qualifications to school students, providing them with the skills and knowledge required for specific industries.

VETiS qualifications can be undertaken in years 10, 11 and 12, and can count towards the Queensland Certificate of Education.

VETiS Options

There are a variety of options available to students to undertake VETiS:

• as part of their school studies, delivered and resourced by a school registered training organisation (RTO)

• through fee-for-service arrangements where a parent/student pays for the qualification with an external RTO

• enrolling in a qualification with an external RTO which is funded by the Department of Education and Training's VET investment budget.

Please contact the Wade Jacobsen 54998168 for additional information on VETiS.

SCHOOL BASED TRAINEESHIPS AND APPRENTICESHIPS

1. Maleny State High School supports students who wish to engage in a school based Apprenticeship or Traineeship

2. Traineeships are available in a wide range of industry areas.

3. Traineeships usually involve Certificate II but can incorporate Certificate III. An apprenticeship usually involves study at Certificate III level.

4. In some cases Certificate III level can be used to in the formulation of an ATAR

5. Traineeships and Apprenticeships must be sourced by the student/family, however the school must be informed before any school based program can comment

6. All require some study through a TAFE or other Registered Training Organization (RTO). Most students will complete a traineeship in 18 months when combining it with school work. It is not possible to complete an apprenticeship while at school and so apprentices will transfer to full or part time work after leaving school.

7. Most trainees are engaged in paid work for about eight hours per week, totalling 240 hours by the conclusion of the year.

8. Maleny State High School encourages students to undertake traineeships or apprenticeships in Years 11 and 12. Under exceptional circumstances, permission can be granted for students to begin before Year 11.

Please contact the Industrial Liaison Officer Tania Mundt 54998108 for additional information on School Based Traineeships and Apprenticeships.

AHC20216 Cert II in Rural Operations

TRAINING PACKAGE NAME: Agriculture, Horticulture and Conservation and Land Management

RTO NAME AND NUMBER: Maleny State High School 30395
